

## TAXONOMIC APPENDIX

The Integrated Taxonomic Information System (ITIS) <<http://www.itis.usda.gov/>>, a taxonomic information database on plants, animals, fungi, and microbes of North America and the world, is a partnership of US, Canadian, and Mexican agencies (ITIS-North America); other organizations; and taxonomic specialists. ITIS is also a partner of Species 2000 and the Global Biodiversity Information Facility. Universal Resource Locator (URLs) addresses are listed below for the species mentioned in this document.

In some computer systems, the links will appear in color, usually blue. Clicking on the link will take the reader directly to the appropriate location in the ITIS database. The computer system must be connected to the Internet.

The links were operational at the time of publication in December 2002.
