Provision of platforms

Provision/facilitation of logistic support

PROPOSED ACTIVITIES

- ✓ QC procedures
- ✓ Coordinate deployment plans
- ✓ Assess & coordinate regional capabilities & knowledge
- ✓ Compile & distribute regional metadata

The ISABP strives to:

- Maintain a data network over the South Atlantic Ocean of in situ environmental monitoring platforms;**
- Establish and maintain data collection and data communication facilities;**
- Distribute basic meteorological and oceanographic data from the network at operationally useful time-scales over the Global Telecommunication System;**
- Arrange for the archival of data;**
- Liaise on technical aspects of buoy development and operational matters;**
- Continually review the effectiveness of the programme in satisfying data requirements of the users.**
