Mr. Bill Lewis
NOAA - NHEML
P. O. Box 8265
University of Miami Branch
Coral Gables, FL 33124

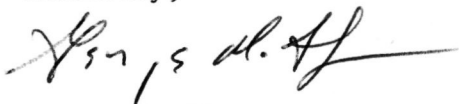

Dear Bill:

Enclosed with this letter is an 8 x 10 black-and-white print from the Weather Radar Camera. The secondary images that were present during the earlier flights have been temporarily corrected. The back of the beam splitter was coated with a dulling spray. Ames photography is getting a front surface mirror constructed to replace the beam splitter.

Also, mailed to you under separate cover is the Weather Radar 35-mm imagery taken during flight number 7, Tropical Storm "CORA."

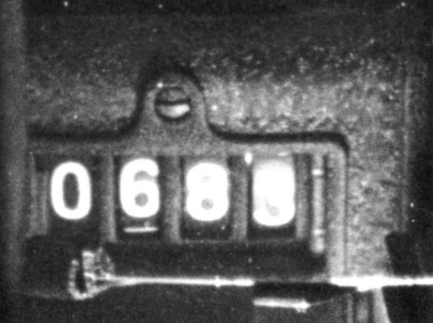

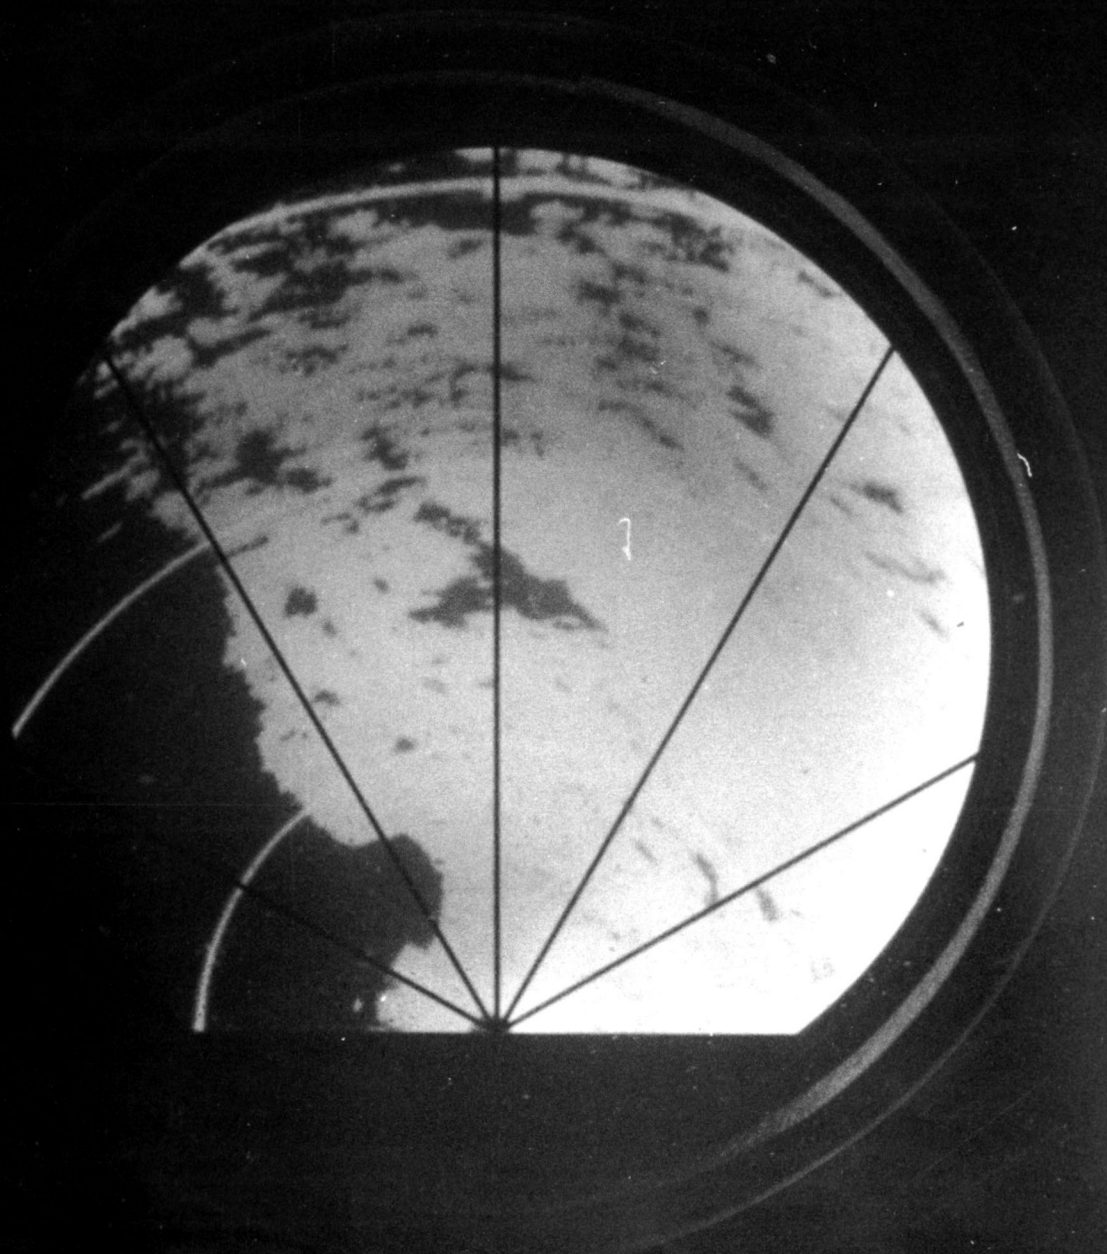

If you have any questions, please contact me.

Sincerely,

George M. Alger
CV-990 Assistant Mission Manager
