MIKE

INTERCOMPARISON FLIGHT with NCAR

20:16 sitting 20:25 take off

NOT running TA.

Probably won't record.

20:58 we are doing stepped descents.
Very few echoes near over $\approx$, most
over land

2109: descent to 1500 m

2117 ~480 m

2126 climbing

2131 turned WEST

2142 - we are turning S

and head for clo south of U.S.

220755 start recording

2219 maneuvering a lot but LF

picture

2220 LF coming & going basically
no signal

RT dead.

It came back to life later, but because
we were through with the pattern we decided
to shut off radar. Problem may be
intermittent.
