The on-board radar scientist is responsible for data collection from all radar systems on his/her assigned aircraft. Detailed operational procedures and checklists are contained in the operator's manual. General supplementary procedures follow. (Check off or initial.)

**Preflight**

1. Determine the status of equipment and report results to the lead project scientist (LPS).
2. Confirm mission and pattern selection from the LPS.
3. Select the operational mode for radar system(s) after consultation with the LPS.
4. Complete the appropriate preflight calibrations and check lists as specified in the radar operator's manual.

**In-Flight**

1. Operate the system(s) as specified in the operator's manual and as directed by the LPS or as required for aircraft safety as determined by the AOC flight director or aircraft commander.
2. Maintain the Radar Scientist's form as well as a written commentary in the radar logbook of tape and event times, such as the start and end times of F/AST legs. Also document any equipment problems or changes in R/T, INE, or signal status.

**Post flight**

1. Complete the summary checklists and all other appropriate forms.
2. Download all radar data files to thumb drive.
3. Brief the LPS on equipment status and turn in completed forms and thumb drives to the LPS.
4. Debrief at the base of operations.
5. Determine the status of future missions and notify HFP Director as to where you can be contacted.
HRD Radar Scientist Check List

Flight ID: 20121028H1

Aircraft Number: 42

Radar Operators: Charles Lynch

Radar Technician: ______________________

Component Systems Status (Up ↑, Down ↓, Not Available N/A, Not Used O):

   Radar Computer ↑ ______________________

   Lower Fuselage antenna ↑ ______________________

   Tail Antenna ↑ ______________________

Time correction between radar time and digital time: _____

Radar Post flight Summary

Significant down time:

   Radar LF ______________________

   Radar TA ______________________

Other Problems:
## Doppler Wind parameters

Doppler flight-leg notes (for use in automatic QC and analysis)
