Richard, Jana and Erica: FYI, the attached article from Haida Corp was just forwarded to me by a colleague involved with the Argo float program. Haida Corp refers to the drifters as "Argo drifterbots" on pg. 3, middle of right-hand column. The article clearly alludes to the release of iron as documented in the news stories we're now aware of, but is very elusive as to what was actually released from their vessel. I had no prior knowledge of this article.

Incidentally, I haven't previously copied you three together on an e-mail. Richard, FYI Jana is my public affairs POC, to whom we today referred a request for an interview from NYT. Erica handles public affairs here at AOML. They are working on a set of talking points on this incident, with my input. Jana and Erica, Richard is in NOAA general council. Likely you all already know each other.

Best,
Rick
