I just received this e-mail from Russ George of Haida. From that blog,  
there was a link to this story in Scientific American:  
[http://www.scientificamerican.com/article.cfm?id=fertilizing-ocean-wit  
h-iron-to-save-salmon-and-earn-money](http://www.scientificamerican.com/article.cfm?id=fertilizing-ocean-wit<br/>h-iron-to-save-salmon-and-earn-money)

Oddly, the article describes the drifters as "20 Argo drifter robots  
<[http://www.scientificamerican.com/article.cfm?id=climate-change-alrea  
dy-strengthens-water-cycle](http://www.scientificamerican.com/article.cfm?id=climate-change-alrea<br/>dy-strengthens-water-cycle)>  
on loan from the U.S. National Oceanic and Atmospheric Administration"  
(the link points to an article about Argo floats, a different  
instrument). This article might generate confused questions about how  
we "loaned" Argo floats and how we expect to get them back.

Rick
