Hi Rick --

I saw that two days ago and sent a correction to Scientific American indicating that they were NOT argo floats and I sent the link tot he drifter page. I'm disappointed that they haven;t corrected it as of yesterday. I'll try and find a phone number today and see how I can fix that/

cheers
jana

I just received this e-mail from Russ George of Haida. =A0From that blog, here was a link to this story in Scientific American:

http://www.scientificamerican.com/article.cfm?id=3Dfertilizing-ocean-with-iron-to-save-salmon-and-earn-money

Oddly, the article describes the drifters as "Argo drifter robots"

http://www.scientificamerican.com/article.cfm?id=3Dclimate-change-already-strengthens-water-cycle> on loan from the U.S. National Oceanic and Atmospheric Administration" (the link points to an article about Argo floats, a different instrument). This article might generate confused questions about how we "loaned" Argo floats and how we expect to get them back.
