

Dear

We are contacting you as someone who has requested to download the *Bilko* remote sensing distance learning training materials from our web site.

The lessons for *Bilko for Windows* Module 7, which focuses on *Applications of Satellite and Airborne Image Data to Coastal Management*, are now available as a 185 page manual and on CD-ROM (which also contains Modules 1–6). If you were unsuccessful at downloading the software because of the size of the files, we are now able to supply you with the manual and/or CD-ROM free of charge. If you e-mail me with your postal address, stating whether you require i) only the Module 7 manual, ii) only the CD-ROM, or iii) both the manual and CD-ROM, we will mail them to you.

The one thing that we request in return is that, when you have had a chance to evaluate the lessons, you return some feedback on the module(s) on the Reply Sheet on page 185 of the Module 7 manual.

Best wishes

Yours sincerely

Tina Tian
