Subject: Re: article and website on NOAA alleging NOAA involvement

To: Allison Reed <allison.reed@noaa.gov>

Allison, I have someone looking into the drifters but I do not think they were provided to the project but, more likely, there was a void in the drifter array (they measure sea level pressure which is used in weather forecasting, as well as SST and displacement) and they found a ship going where they needed drifters and was willing to deploy them.

Steve
