All,

As a courtesy, I shared our Q&A document with Allison Reed in International
Affairs, who is a conduit to State Dept & EPA on this issue. She has some
input attached.

Not sure how the NOAA logo got onto their website and not sure how we can
remedy that -- Rick/Erica, any insight?

(Allison - for your last question, I don't believe drifters are recovered
often. Sometimes when they wash up and we find them, I think they can be
discarded.)

V/r,
John

Subject: Re: DRAFT Q&As re: sulfate dump off Canada
To: John Ewald <john.ewald@noaa.gov>

Thanks John, I have attached a few edits, and one additional question that
may be posed at the end of the Q/A. Unfortunately it looks as though
everything is saved now as the same color for tracked changes. I am not

sure how that happened, but hopefully you can see which edits I have added. Main edits relate to changing text to reflect that we accepted their offer to deploy vs we donated these to them. I believe the changes reflect the situation a bit more accurately, however happy to defer to the experts in the drifter program.

The additional Q I pose at the end is related to NESDIS logo on HSRCs website. I dont know the know the answer to that.

Additionally, it may be useful to answer a Q on whether drifters are ever recovered. Again I dont know the answer to that.

Allison
