Hi Rick -- Hope all is well with you. We're going to be attendinbg the
London Convention/London Protocol meeting in about a week and we'll
certainly get questions. I'm not going to have much patience with any
suggestion that we gave material assistance to the dumpers. If they had
dumped in an area that already had a sufficient number of drifters, and
they got surface current information there, would we be "partnering" with
them. We had an offer to deploy drifterss in an area where we needed them.
The drifters were taken to that area and deployed. They are working and
sending back the information we need. They'll always be a limit to what
we
can find out about other purposes the vessel might have. As we get readdy,
if you have any other background information that you think might be
useful, it would be great for us to have it. One thing we discussed was
the fact that this is an international partnership and that public vessels
of other nations deploy these devices. Do you know if other nations also
enlist private fishing and cargo vessels? Thanks.
