HEALTH SERVICES QUESTIONNAIRE

Application for Medical Qualification to Embark a NOAA Ship

INSTRUCTIONS

The Health Services Questionnaire must be submitted to MOC Health Services 30 days in advance of the project start date. The form must be legible and complete. Unreadable or incomplete forms will be returned to the applicant. Late submissions may result in delayed qualification of sea duty past the project start date.

All positive responses in the General Screening and Cardiac Screening sections require a detailed explanation in the space provided. The Continuation Page may be used if more space is needed. An indication of hypertension requires the most recent blood pressure reading. An indication of diabetes requires the most recent glycosylated hemoglobin (HbA1c) reading.

All persons embarked aboard a NOAA ship must have a test for tuberculosis (TB) within the 12 months preceding the project end date. MOC Health Services accepts three tests to detect exposure to the TB bacteria; the Purified Protein Derivative (PPD or TB skin test), the QuantiFERON-TB test (QFT or TB blood test), and the T-spot blood test. PPD results must be recorded in millimeters (mm) and not documented as positive or negative. QuantiFERON-TB and the T-spot results must be indicated as negative, positive, or indeterminate.

All persons embarked on a NOAA ship must be able to perform normal work functions and minimal personal emergency response functions while the ship is underway. During an abandon ship event, personnel may have to don a survival suit and/or descend a rope ladder to a life raft or rescue craft. Personnel deploying in small boats for operations may have to ascend and descend a rope ladder. A rope ladder (as pictured to the right) is a heavy duty ladder with rigid rungs that hangs over the side of the ship used for underway embarkation and disembarkation of personnel. A survival suit (as pictured to the right) is a full-body single-piece coverall designed to provide thermal protection to personnel immersed in water. A person at sea should be able to don a survival suit in one minute while fully clothed and without having to remove shoes. All negative responses in the Functional Abilities Screening section require additional explanation on the Continuation Page.

Sign and date the form in Section VII. Do not write in the "MOC Health Services Use Only" section. Use the Continuation Page to provide any additional information. Direct all questions regarding the information required on this form to the MOC Health Services Medical Officer at MOC-Atlantic (757) 441-6320 or MOC-Pacific (541) 867-8820.
