

A satellite image of a hurricane, showing a well-defined eye and spiral cloud bands, occupies the left half of the slide. A solid blue vertical bar is positioned between the image and the text.

Advancing Model Developments & R2O (HFIP)

Gopal (HRD)

Gus Alaka (HRD), Bill Ramstrom (HRD/CIMAS), Lew Gramer (HRD/CIMAS), Xuejin Zhang (HRD), Andy Hazelton (Formerly HRD/CIMAS), and Zhan Zhang (EMC)*

Collaborators: *EMC modeling team & HFIP

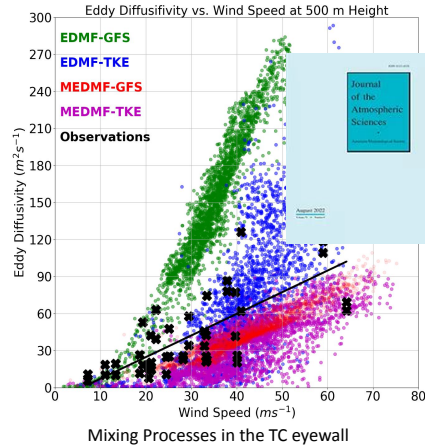

Atlantic Oceanographic & Meteorological Laboratory
National Oceanic and Atmospheric Administration
U.S. Department of Commerce

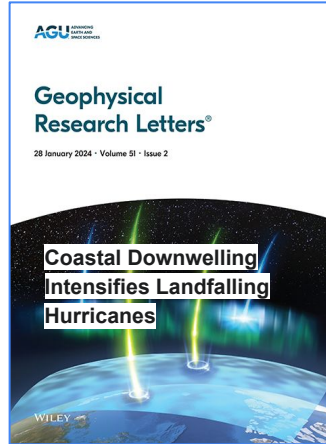

Our Objectives - Improving Hurricane Forecasts

DEVELOP
next-generation hurricane
models

USE
aircraft observations to
improve the model

ADVANCE
understanding of
hurricanes using models

TRANSITION
Research to operations
(R2O) & support HFIP

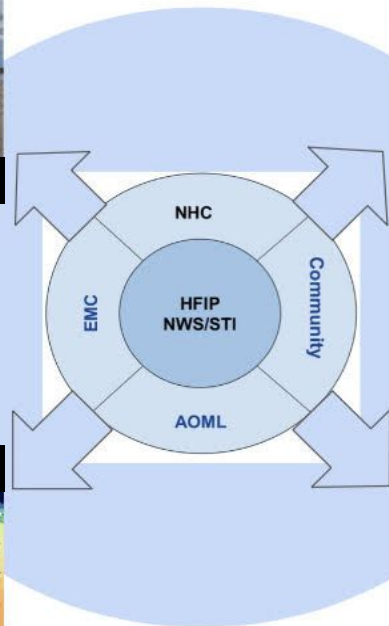

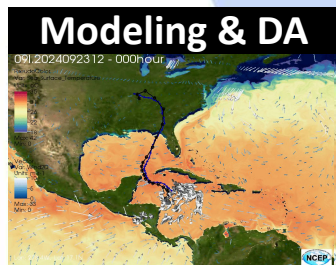

HFIP - Making Hurricane Forecasts Better

HFIP | HURRICANE FORECAST
IMPROVEMENT PROGRAM

HFIP - Making Hurricane Forecasts Better

HFIP - Making Hurricane Forecasts Better

Lifetime Performance of the Operational Hurricane Weather Research and Forecasting Model (HWRF) for North Atlantic Tropical Cyclones

Ghassan J. Alaka Jr. , Jason A. Sippel, Zhan Zhang, Hyun-Sook Kim, Frank D. Marks, Vijay Tallapragada, Avichal Mehra, Xuejin Zhang, Aaron Poyer, and Sundararaman G. Gopalakrishnan

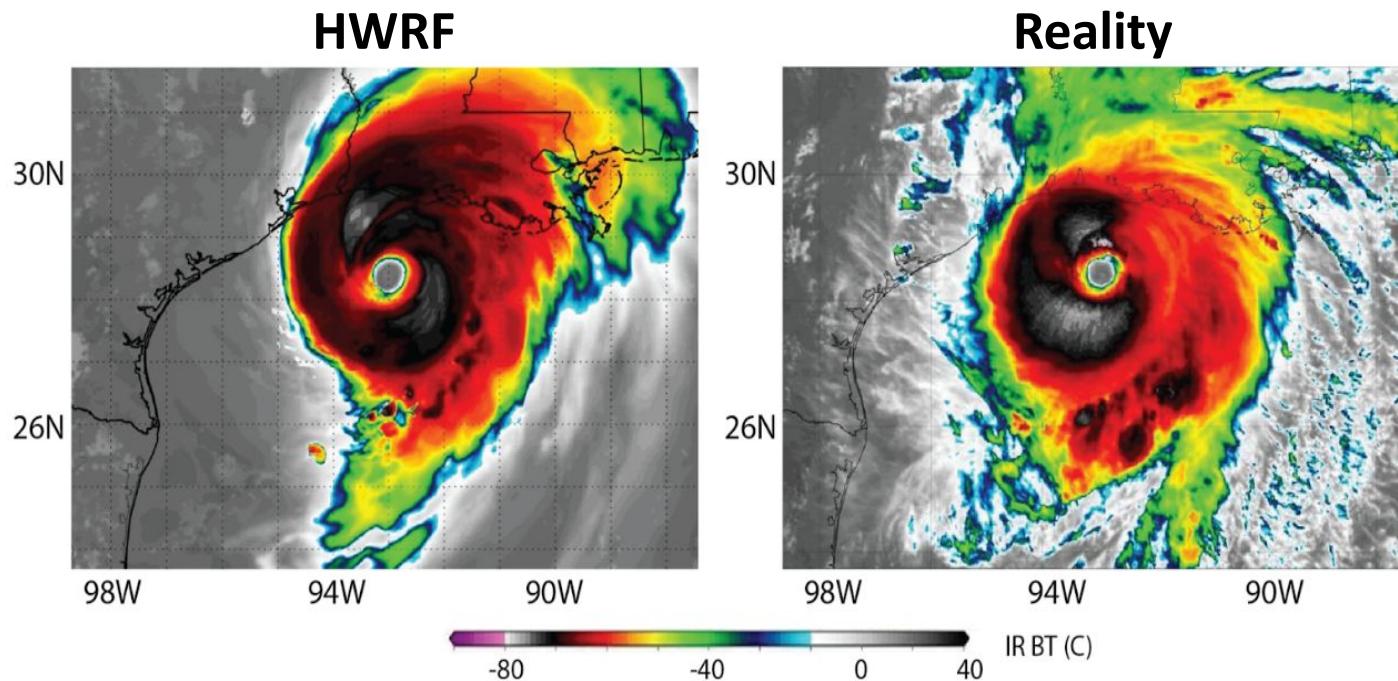

Track Error

Intensity Error

Quiz: HWRF or Reality?

NO MAGIC BULLET!

High-Res. Moving Nests | Physics | Inner-Core DA | Ocean Coupling | Science | Rigorous T&E

HAFS: The Hurricane Analysis and Forecast System

HAFS FACTS

- Unified Forecast System (UFS)
- AOML-EMC-GFDL collaboration
- Developed in Record Time
- Community Model
- Two Versions: HAFS-A & HAFS-B
- 15% Track Improvements -vs- HWRF
- 2-3% Wind Improvements -vs- HWRF

Helene 09L

HAFS-M Forecast Performance

2024 Atlantic Hurricane Season

Track Percent Improvement

Intensity Percent Improvement

HAFS-M OPENS THE DOOR FOR...

- Next-generation TC modeling
- Interactions between storms
- DA frontiers (JEDI)
- Probabilistic forecasting
- Hazard prediction

Operational HAFS-B
Experimental HAFS-M

HAFS-M Forecast Performance

Future Direction - Global HAFS
